GARIMA SHINGAL

Full Stack Developer

Burlington, Ontario, Canada | er.garimasinghal@gmail.com | 289-885-3643 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full stack developer with 6+ years of prior software engineering experience, currently focused on building modern, scalable, high-performance web applications using React, Next.js, and TypeScript. Experienced in developing responsive, accessible (WCAG/AODA-compliant) interfaces and integrating REST, GraphQL APIs, SEO and performance optimization. Strong collaborator with product, design, and cross-functional teams to deliver user-focused features. Product-minded and self-driven, with hands-on experience delivering modern web applications in fast-paced environments.

TECHNICAL SKILLS

- **Front-End:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion, Leaflet.js, State Management
- **Back-End & APIs:** Node.js, Express.js, Python, REST APIs, GraphQL
- **Testing & Quality:** Unit Testing, Code Reviews, Debugging
- **Databases:** MongoDB, PostgreSQL, SQL Server, Firebase, Pocketbase
- **Tools & Cloud:** Git, GitHub, GCP, AWS, Vercel, Postman
- **Other:** WCAG/AODA Accessibility, SEO Optimization, Responsive Design
- **AI & Methodologies:** GenAI/LLM-assisted development, Prompt Engineering, Agile/Scrum

KEY PROJECTS

AI Interview Simulator (In Progress | GitHub)

- Building a full-stack, voice-first interview simulation platform using React, TypeScript, and MongoDB.
- Integrating LLM APIs to generate real-time, role-specific interview feedback.
- Designing scalable frontend architecture with focus on performance and usability.

StormShieldAI (Hackathon Project)

- Developed an AI-powered flood prediction system using Python and real-time data integration using BrightData.
- Processed weather data and historical patterns to generate predictive alerts.
- Built as part of a World-Wide Vibes Hackathon with real-world problem focus.

Path To Green Homes (Client Project)

- Delivered a full-stack SaaS platform using React, Node.js, SQL, and REST APIs.
- Implemented payment integration, responsive UI, and SEO optimization.
- Independently managed end-to-end development and deployment.

STEMplore (Volunteer Project)

- Built interactive onboarding and learning modules using React, Next.js, and TypeScript
- Focused on accessibility, performance optimization, and scalable UI components

PROFESSIONAL EXPERIENCE

Frontend / Full Stack Developer | Freelance | Remote | *Jul 2022 – Present*

- Built and maintained modern web applications using React, Next.js, TypeScript, and Tailwind CSS.
- Developed scalable frontend architectures and reusable component systems.
- Integrated RESTful and GraphQL APIs for dynamic, data-driven applications.
- Ensured responsive, accessible (WCAG-compliant) UI across mobile and desktop devices.

- Collaborated with stakeholders to design, develop, and launch new features.
- Participated in code reviews and followed best practices for code quality.
- Worked on SEO strategies including dynamic metadata, sitemap generation, and optimized routing.
- Implemented CI/CD workflows using GitHub Actions and managed deployments via Vercel.
- Optimized performance and improved user engagement through efficient rendering techniques.

Software Engineer | The Citizen Project | Remote | *Sep 2024 – Aug 2025*

- Developed scalable, reusable UI components using React, Next.js, TypeScript, and Tailwind CSS for a high-performance SPA.
- Improved application performance and usability through optimized rendering and responsive design across devices.
- Collaborated closely with design and product teams, translating Figma designs into pixel-perfect, accessible interfaces.
- Ensured WCAG-compliant accessibility and cross-browser compatibility for consistent user experience.
- Managed static assets using AWS S3 within a cloud-based architecture.
- Contributed to code reviews, technical discussions, and feature planning in an Agile environment.
- Wrote clean, maintainable, and well-documented code following modern frontend best practices.

Career Break | *2012 – 2022*

- Took a planned career break for family responsibilities
- Maintained technical interest and recently re-skilled in modern web technologies

Senior Software Engineer | Open Solutions Software Services | India | *Oct 2010 – May 2012*

- Led frontend development for enterprise applications using JavaScript, HTML, and CSS with modular, maintainable component architecture.
- Partnered with UX designers and product managers to deliver usability enhancements and performance improvements.
- Ensured code quality through architectural best practices and cross-team code reviews.

Software Engineer | MS Technology Pvt Ltd | India | *Jul 2006 – Oct 2010*

- Developed high-performance enterprise software, integrating client-side modules for seamless deployments.
- Resolved critical production issues and optimized code for system-level performance and reliability.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science — Uttar Pradesh Technical University, India

- Career Essentials in Generative AI — Microsoft & LinkedIn
- AI Fundamentals with Capstone Project — IBM
- Scrum Fundamentals — SCRUMstudy
- Accessibility for Ontarians with Disabilities Act (AODA) Training
- World Wide Vibes Hackathon — GenAI Works
